## **DETAILED ACTION**

### ***Election/Restriction***

1. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 5, directed to the species having a J-shaped hook is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. However, claims 8-23, directed to a non-elected apparatus group remain withdrawn from consideration since they do not depend upon or otherwise include all the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

## **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 8-23, drawn to an invention non-elected without traverse. Accordingly, **claims 8-23 have been cancelled.**

3. The following is an examiner's statement of reasons for allowance: the prior art neither anticipates nor makes obvious a method of securing a hitch to a tow hook, the method including the steps of providing a hook engagement member as recited in detail, inserting the hook engagement member within a hollow inner passage of a tow hook, and specifically including a step of clamping the hitch about upper and lower surfaces of the tow hook to maintain the member within the passage of the tow hook. The above recitation, combined with the rest of the structure in the independent claim, clearly defines over the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lenzen, Jr. et al. (U.S. Patent Application Publication No. 2004/0090041 A1), Pierman et al. (U.S. Patent No. 6,672,609 B2), Chester (U.S. Patent No. 5,054,806), Williams (U.S. Patent No. 5,150,911), Chou et al. (U.S. Patent No. 5,716,066), Peterson (U.S. Patent No. 5,755,454), and Ohkura et al. (DE Patent No. 100 41 063) disclose methods for securing vehicles to front-mounted tow hitches.
